

Aero

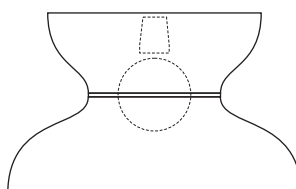

Aerodynamic, soft lines combined with bright colour accent, this lamp is little retro - little futu. Initially created for two circular fluorescent lamps in one shade to achieve truly efficient and not distracting illuminance. Same shape can be used with ordinary E27 socket, ball-pulb 18W recommended.

Basic finishes - white, black or aluminium lacquered.
Cord and ring colours blue, red, green.
Wide range of other colours upon request.

Good for residential as well for public space.
